Physical (conditional)
Open
Physical (near-miss)
Open (relic scale)
Open (superseded)
Physical (conditional) (superseded)
Physical (input)
Open
Numerical (structural grounding)
Physical (conditional reframe)
Numerical (second path)
Identity (audit layer)
Identity
Physical (conjecture)
Numerical (survival hardened)
Numerical (selector side closed)
Numerical (Hitchin reduced to finite)
Numerical (honest negative + suggestive link)
Identity [I] + Physical [P]
Identity [I] (rigidity) + [A] (U_point)
Identity/Lattice [I]/[L] + [P] geometry
Lattice [L] + selection [P]
Identity [I] + physical origin [P]
Identity
Identity/Lattice [I]/[L]
Lattice/Lie [L] (typing) + [P] (normalisation)
Numerical (typing confirmed + honest negative)
Identity
Identity [I]
Identity/Lie [I]/[L]
Lie/lattice [L]
Identity/Lie [I]/[L] + anchor identification
Identity/Lie [I]/[L] (structure) + [A] (residual k=c3/2)
Lie/lattice [L] + identity [I]
Numerical/data [N]
Identity core + [P] argument
Identity [I] + taxonomy [A]
Numerical/data [N]
Identity/Lie [I]/[L]
Identity + observational [N] + [P] consequence
Numerical + identity [I] (necessary condition)
Identity [I] + open theorem [A]
Identity [I] + [P] cross-links
Identity/Lie [I]/[L]
Identity/Lie [I]/[L]
Identity [I]
Identity [I]
Identity [I] (ratios) + [A] (U_point=anchor)
Identity [I] chain + [L] non-abelian Hodge
Identity [I] + Lattice/topology [L] (coefficient) + [A] (absolute scale only)
Identity [I]
Identity [I] (reduction) + [A] (the one scale v_geo)
Identity [I] (decoupling, cond. on norm bound) + [P]/[A] (boundary G6)
Identity [I] (central charges, embedding) + [P] (net identification)
Identity [I] (ratios) + [A] (the one scale, by dimensional analysis)
Formal
Identity/Lattice [I]/[L]
Identity/Lattice [I]/[L] + audit [P]
Identity/Lattice [I]/[L] + audit [P]
Physical (conjecture sharpened) + Identity [I]
Identity [I] + Physical [P] (sector id)
Red-team [P] (reduced, not closed)
Red-team [I]+[A] (survives, narrowed)
Red-team [I]+[A] (survives)
Red-team [I]+[A] (survives, narrowed)
Red-team [I]+[A] (survives, narrowed)
Lattice [L] (residual 1 closed) + [P]/[A] (residuals 2-3 open)
Identity/Lattice [I]/[L] (B residual reduced to the half-spinor input)
Numerical [N] (registry lock) + typing discipline
Identity/Lattice [I]/[L] (GL(2) covariance + family classification) + [P] physical readings
Physical [P] (conditional on M_Star=M_scal + standard reheating)
Lattice [L] (classification + machine contrast) + [P]/[A] (the one remaining hypothesis)
Numerical [N] (audit + thresholds) + [P] (phase mechanism open)
Lattice [L] (index arithmetic + reframing) + [P]/[A] (seam side identification)
Identity [I] (chain derived) + [A] (the one isolated residual)
Identity [I] (closures + negative control) + Audit (chi_F fingerprint; dual cuts = presentation)
Identity/Lattice [I]/[L] (exhaustive classification) + [P]/[A] (seam side)
Identity [I] (basin/rate/source) + Numerical [N] (pole) + [P] (transfer mechanism)
Numerical (second path, extension verified 83/85)
Formal [F] (Lean kernel; no extra axioms)
External reproduction (substantive PASS) + process fix
Identity [I] (surface/winding/normal closures + negative controls) + Audit (F corner) + honest correc
Identity [I] (canonical readings; old readings = corollaries)
Identity [I] (normal form + invariants + cross-links) + Audit (G2 reading)
Identity/Lattice [I]/[L] (kernels, collapse, ladder, controls) + [P] (sector-sheet physics)
Identity/Lattice [I]/[L] (uniqueness, D4, index 2) + [P] (the one lattice dictionary)
Identity/Lattice [I]/[L] (dictionary derived; residual folded into GATE:GGEO)
Identity [I] (generator) + Numerical [N] (fragility) + Physical [P] (conditional steps)
Numerical [N] (statistical null-model rejection, Python-only)
