

Twin double covers: the same split N_{fam} -linear form in flavor and in classical gravity

flavor: $y^2 = \det B_{K+xQ} = (3x+2)(3x+5)$

two sheets, branch points $-\frac{2}{3}, -\frac{5}{3}$

gravity: $w^2 \propto \text{disc} = (1-3m)(1+3m)$

branch points $\pm\frac{1}{3} = \pm 1/N_{\text{fam}}$
