

The translation clock: discrete  $\leftrightarrow$  dynamic  
 order-30 Coxeter element = static 5  $\times$  dynamic 6

dynamic hand  $\mathbb{Z}/6 = 2N_{\text{fam}}$  (0..5): rate  $(2/3)^6$ , exponent 6

static hand  $\mathbb{Z}/5 = g_{\text{car}}$  (1..5): golden  $\sqrt{5}$ , no rate
